

Procedure Electronic Resources and Internet Safety

K-20 Network Acceptable Use Guidelines/Internet Safety Requirements

These procedures are written to support the Electronic Resources Policy of the board of directors and to promote positive and effective digital citizenship among students and staff. Digital citizenship represents more than technology literacy. Successful, technologically-fluent digital citizens live safely and civilly in an increasingly digital world. They recognize that information posted on the Internet is public and permanent and can have a long-term impact on an individual's life and career. Expectations for student and staff behavior online are no different from face-to-face interactions.

Use of Personal Electronic Devices

In accordance with all district policies and procedures, students and staff may use personal electronic devices (e.g. laptops, mobile devices and e-readers) to further the educational and research mission of the district. School staff will retain the final authority in deciding when and how students may use personal electronic devices on school grounds and during the school day.

Network

The district network includes wired and wireless devices and peripheral equipment, files and storage, e-mail and Internet content (blogs, websites, collaboration software, social networking sites, wikis, etc.). The district reserves the right to prioritize the use of, and access to, the network.

All use of the network must support education and research and be consistent with the mission of the district.

Acceptable network use by district students and staff include:

- A. Creation of files, digital projects, videos, web pages and podcasts using network resources in support of education and research if under the direction of the teacher;
- B. With parental permission, the online publication of original educational material, curriculum related materials and student work. Sources outside the classroom or school must be cited appropriately;
- C. Staff use of the network for incidental personal use in accordance with all district policies and procedures.

Unacceptable network use by district students and staff includes but is not limited to:

- A. Personal gain, commercial solicitation and compensation of any kind;
- B. Actions that result in liability or cost incurred by the district;
- C. Downloading, installing and use of games, audio files, video files or other applications (including shareware or freeware) without permission or approval from the Director of Technology;
- D. Support for or opposition to ballot measures, candidates and any other political activity;
- E. Hacking, cracking, vandalizing, the introduction of viruses, worms, Trojan horses, time bombs and changes to hardware, software and monitoring tools;
- F. Unauthorized access to other district computers, networks and information systems;

- G. Cyberbullying, hate mail, defamation, harassment of any kind, discriminatory jokes and remarks;
- H. Information posted, sent or stored online that could endanger others (e.g., bomb construction, drug manufacturing);
- I. Accessing, uploading, downloading, storage and distribution of obscene, pornographic or sexually explicit material; or
- J. Attaching unauthorized devices to the district network. Any such device will be confiscated and additional disciplinary action may be taken.

The district will not be responsible for any damages suffered by any user, including but not limited to, loss of data resulting from delays, non-deliveries, mis-deliveries or service interruptions caused by his/her own negligence or any other errors or omissions. The district will not be responsible for unauthorized financial obligations resulting from the use of, or access to, the district's computer network or the Internet.

Internet Safety

Personal Information and Inappropriate Content:

- A. Students and staff should not reveal personal information, including a home address and phone number on web sites, blogs, podcasts, videos, social networking sites, wikis, e-mail or as content on any other electronic medium;
- B. Students and staff should not reveal personal information about another individual on any electronic medium without first obtaining permission;
- C. No student pictures or names can be published on any public class, school or district website unless the appropriate permission has been obtained according to district policy; and
- D. If students encounter dangerous or inappropriate information or messages, they should notify the appropriate school authority.

Filtering and Monitoring

Filtering software is used to block or filter access to visual depictions that are obscene and all child pornography in accordance with the [Children's Internet Protection Act \(CIPA\)](#). Other objectionable material could be filtered. The determination of what constitutes "other objectionable" material is a local decision.

- A. Filtering software is not 100-percent effective. While filters make it more difficult for objectionable material to be received or accessed, filters are not a solution in themselves. Every user must take responsibility for his/her use of the network and Internet and avoid objectionable sites;
- B. Any attempts to defeat or bypass the district's Internet filter or conceal Internet activity are prohibited and will be considered an egregious violation of district policy, which may result in loss of network privileges (e.g., proxies, https, special ports, modifications to district browser settings and any other techniques designed to evade filtering or enable the publication of inappropriate content);
- C. E-mail inconsistent with the educational and research mission of the district will be considered SPAM and blocked from entering district e-mail boxes;
- D. The district will provide appropriate adult supervision of Internet use. The first line of defense in controlling access by minors to inappropriate material on the Internet is deliberate and consistent monitoring of student access to district devices;
- E. Staff members who supervise students, control electronic equipment or have occasion to observe student use of said equipment online, must make a reasonable effort to monitor the use of this equipment to assure that student use conforms to the mission and goals of the district; and
- F. Staff must make a reasonable effort to become familiar with the Internet and to monitor, instruct and assist effectively.

- G. The district will provide a procedure for students and staff members to anonymously request access to internet websites blocked by the district's filtering software. The procedure will indicate a timeframe for a designated school official to respond to the request. The requirements of the Children's Internet Protection Act (CIPA) will be considered in evaluation of the request. The district will provide an appeal process for requests that are denied.

Internet Safety Instruction

All students will be educated about appropriate online behavior, including interacting with other individuals on social networking websites and in chat rooms, and cyberbullying awareness and response:

- A. Age appropriate materials will be made available for use across grade levels; and
- B. Training on online safety issues and materials implementation will be made available for administration, staff and families.

Copyright

Downloading, copying, duplicating and distributing software, music, sound files, movies, images or other copyrighted materials without the specific written permission of the copyright owner is generally prohibited. However, the duplication and distribution of materials for educational purposes is permitted when such duplication and distribution falls within the [Fair Use Doctrine](#) of the United States Copyright Law ([Title 17, USC](#)) and content is cited appropriately.

Ownership of Work

All work completed by employees as part of their employment will be considered property of the district. The district will own any and all rights to such work including any and all derivative works, unless there is a written agreement to the contrary.

All work completed by students as part of the regular instructional program is owned by the student as soon as it is created, unless such work is created while the student is acting as an employee of the school system or unless such work has been paid for under a written agreement with the school system. If under an agreement with the district, the work will be considered the property of the district. Staff members must obtain a student's permission prior to distributing his/her work to parties outside the school.

Network Security and Privacy

Network Security

Passwords are the first level of security for a user account. System logins and accounts are to be used only by the authorized owner of the account for authorized district purposes. Students and staff are responsible for all activity on their account and must not share their account password.

The following procedures are designed to safeguard network user accounts:

- A. Change passwords according to district policy;
- B. Do not use another user's account;
- C. Do not insert passwords into e-mail or other communications;
- D. If you write down your user account password, keep it in a secure location;
- E. Do not store passwords in a file without encryption;
- F. Do not use the "remember password" feature of Internet browsers; and
- G. Lock the screen or log off if leaving the computer.

Student Data is Confidential

District staff must maintain the confidentiality of student data in accordance with the [Family Educational Rights and Privacy Act \(FERPA\)](#).

Student Technology Use of Web Based Educational Curriculum and Services.

Ocean Beach School District (OBSD) uses a number of third party web-based educational services. The number of web based programs will continue to increase annually. Among those your child may use are Google Apps for Education (GSuite), Renaissance Place, Math Whizz, Hapara, MobyMax, Prezi, Skyward, Think Central, Typing.com, Apex Learning, and even the district's library automation program, Alexandria Researcher. All are web based and have few if any comparable paper alternatives. These tools help create a more engaging learning environment for district students. Additionally, an important part of students becoming good digital citizens is having opportunities to access materials on the Internet in a responsible and effective manner. OBSD supports the Children's Online Privacy Protection Act ([COPPA](#)) and insists that websites the district uses adhere to this law.

In order for our students to use these services, certain personally identifiable information must be provided to the website operator. Under [COPPA](#), a federal law, these websites must obtain parental consent before collecting information. The law allows school districts to consent to the collection of personal information on behalf of all of its students, thereby eliminating the need for individual parental consent given directly to the website operator.

By signing the Acceptable Use Agreement (2022F), you authorize the district to provide consent to all third parties adopted by district schools under COPPA, including GSuite. Information provided to third parties will be limited to a student's name, network username, and district-provided email address unless otherwise stated on the district's Technology page under Third Party Service Providers.

Families who wish to opt out of the use of technology are strongly encouraged to consult with your child's school principal to further understand the consequences of choosing not to use technology resources before you make a final decision to opt out. Consider the impacts this will have on a student's educational experience. Many classes, if not most, are managed and delivered to students online via Google Classroom. Our library catalog (Alexandria Librarian), Skyward Student Access and Skyward Family Access, are all delivered via Internet enabled devices.

No Expectation of Privacy

The district provides the network system, e-mail and Internet access as a tool for education and research in support of the district's mission. The district reserves the right to monitor, inspect, copy, review and store without prior notice information about the content and usage of:

- A. The network;
- B. User files and disk space utilization;
- C. User applications and bandwidth utilization;
- D. User document files, folders and electronic communications;
- E. E-mail;
- F. Internet access; and
- G. Any and all information transmitted or received in connection with network and e-mail use.

No student or staff user should have any expectation of privacy when using the district's network. The district reserves the right to disclose any electronic messages to law enforcement officials or third parties as appropriate. All documents are subject to the public records disclosure laws of the State of Washington.

Archive and Backup

Backup is made of all district e-mail correspondence for purposes of public disclosure and disaster recovery. Barring power outage or intermittent technical issues, staff and student files are backed up on district servers regularly. Refer to the district retention policy for specific records retention requirements.

Disciplinary Action

All users of the district's electronic resources are required to comply with the district's policy and procedures (and agree to abide by the provisions set forth in the district's user agreement). Violation of any of the conditions of use explained in the district's user agreement, Electronic Resources policy or in these procedures could be cause for disciplinary action, including suspension or expulsion from school and suspension or revocation of network and computer access privileges.

Adoption Date: **05.21.12**

Classification: **Priority**

Revised Dates: **10.17; 8.18**
